DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a cathodic electrodeposition composition and a process of using the composition, classified in class 204, subclass 499.
 - II. Claims 9 and 10, drawn to a coated substrate, classified in class 428, subclass 626+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown:
 - (1) that the process as claimed can be used to make another and materially different product or
 - (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).In the instant case the product as claimed can be made by a non-electrodeposition process.
3. Because these inventions are independent or distinct for the reasons given

above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Attorney Hilmar Fricke on 31 August 2006 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiner's Amendment

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Hilmar Fricke on 11 September 2006.

The application has been amended as follows:

In the claims:

Claim 1, line 3, after "comprising", insert --an additive of--.

Claim 4, line 3, after "applying", insert --by cathodic electrodeposition--; and

line 5, after "comprises", insert --an additive of--.

Claim 8, line 3, after "applying", insert --by cathodic electrodeposition--; and

line 5, after "comprises", insert --an additive of--.

Cancel non-elected claims 9 and 10 to the filing of a divisional application.

7. The following is an examiner's statement of reasons for allowance: Because the prior art references do not disclose a cathodic electrodeposition composition

comprising the recited cyclic imide additive as claimed in claims 1-3 and in a process the step of applying by cathodic electrodeposition a cathodic electrodeposition composition comprising the recited cyclic imide additive as claimed in claims 4-8. Here the recited cyclic imide is an additive, that is a compound to be added to and not part of the resin binder of the cathodic electrodeposition composition, and has a support in page 5, lines 6-10 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kishor Mayekar whose telephone number is (571) 272-1339. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen can be reached on (571) 272-1342. The fax

phone number for the organization where this application or proceeding is assigned is 571-273-8300.
